# WE SHARE THE LAND DIARY

December 2018 - January 2021

## ... We all remember the day we met...

Some strangers surfing the Etwinning site searching for common passions for knowledge and learning, willingness to cooperate with our students in order to meet our cultures and traditions.

This way our three partner groups have been formed...

"We Share the Land" 's project was about training and teaching strategies to help students keep agriculture on track! Students, teachers and local partnerships (farmers, producers, public institutions, etc.) explored questions related to these issues to experience, compare and share their own and other countries' practices. This project was aimed at studying, on defined territories, the harmonious coexistence between economic agricultural activities, the management of a natural park with wildlife conservation and sustainable leisure's activities. We wanted to study how it's possible to generate economic resources and synergies.

We, the 3 agricultural and vocational school partners from France, Italy and Poland were sharing a common motivation. European cooperation was grounded in our school project. The desire to do our best to help our students to increase their understanding of agricultural matters and thus to choose a future job that will suit their real interest, motivation. Our topic met the requirements of interest on national as well as international grounds and allowed the students discover and work on many facets offered by the subject. In that process students acquired knowledge, had different points of view and also discovered their creativity and capabilities. We're also convinced that foreign languages and cultures gave a greater confidence, opened mind and will enhance employability.

*Italy: Laura Resmini*

*France: Nathalie Garcia-Dugenit*

# FIRST MOBILITY

## POLAND - Zespół Szkół RCKU w Przemystce

### 27 - 31 May 2019

*... We all remember it as if it was yesterday. Our excitement was on a really high level. Long weeks of planning, organising and meetings. Everything had to be just perfect.*

*What was the worst??? Our idea to host our guests from Italy and France with our version of spaghetti. Now we know it was a stupid idea, because nothing can compare with this original Italian dish. Sorry Italy ;) ...*

*... preparations in progress...*

# DAY 1

...It was a fantastic day. After a warm welcome prepared by our local authorities and our headmaster, we took part in different workshops. One group went to our kitchen to find out how to prepare our Polish specialty „Pierogi”. It was so funny. We made dumplings with cottage cheese and others with onion and mushrooms. All our guests could taste it ;)

The second group took part in cosmetic workshops. We were making our own lip balms and paraffin treatment for hands. It was very relaxing. Our third group attended agricultural workshops. We could drive by tractors on the fields in front of the school. It was a new experience for many of us. The last group took part in workshops with fire services. There was a great competition for us and we could watch a fire truck much closer.

After some hours we all attended a lecture on beekeeping and honey production in Poland. We had an occasion to try some honey types. It was the most delicious lecture we have ever taken part in. The last part of that day and for many of us the best part was our evening supper in a restaurant. We spent a wonderful time together...

# DAY 2

... This day was really busy for all of us. We didn't even have time to search our smart phones :)

We started our day with a big breakfast and a coach took us to the nearest Arabian horse stable. We found out many interesting facts and we could admire those beautiful animals. Next, after two hours we moved to the factory of machinery and equipment. We could observe the production and some new machines. It was really interesting.

Then we went to the museum of Polish village. The weather wasn't good but it didn't stop us from discovering how life was in Poland hundreds years ago. We took part in workshops of oil production as well as butter production. A slice of bread with home-made butter was perfect.

The rest of the day we spent in an agritourism farm. We had a barbecue with Polish specialities, we could play volleyball or go for a walk. Nice relax after such a busy day...

# DAY 3

... That day was really beautiful. Ideal for trips. The sun was shining and birds were singing. After breakfast our coach took us to the nearest city Kruszwica. There we could visit the famous Mice Tower, which has a great history. The bravest of us went to the top of it and took some nice photos. Then we had a relaxing cruise by the Gopło lake. We could watch the beauty of nature and we took a lot of interesting pictures too for our photo competition. After such a relaxing cruise we went to Inowrocław, where we visited a graduation tower. We could inhale the health brine and enjoy the sun. In the evening there was a dinner and dancing :) ...

# DAY 2

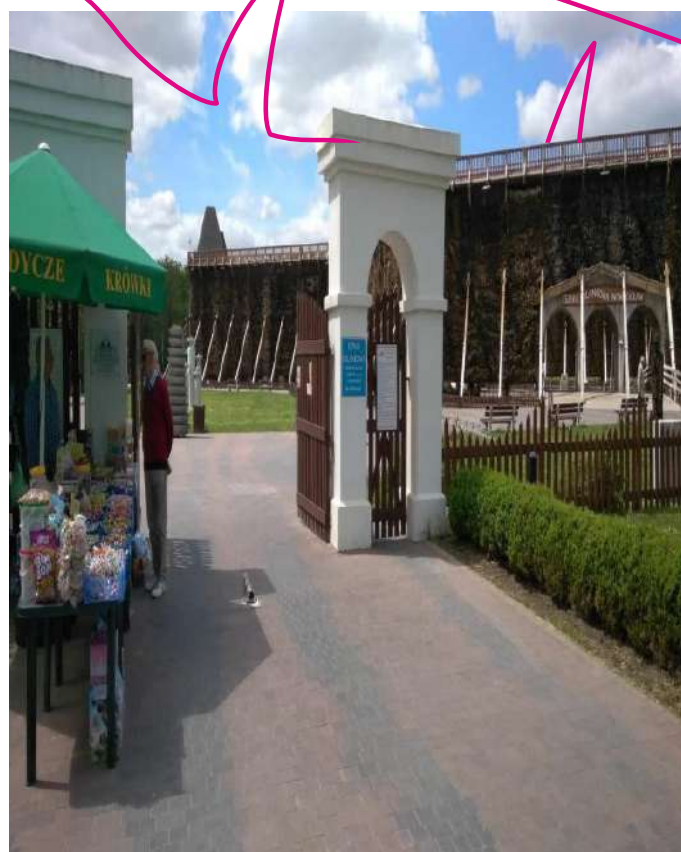

... After a delicious breakfast and a presentation of the day by students we went by coach to La Brenne to visit an organic goat farm producing cheese. We could find out a lot about technology, breeding and we could taste the cheese, too.

Then our coach took us to an old medieval castle. Thanks to our guide and French students we could find out many interesting facts about it.

A picnic with carp chips was an excellent idea. Then we could go back to school and we had some free time to play football and have some rest before dinner...

# DAY 4

... Because of the fact it was one before the last day of mobility in Poland we decided to hand in some farewell gifts to our guests. Then we had a meeting in our local government with a person from environmental protection department. We watched an interesting multimedia presentation about fauna and flora of our region. Next point was a lunch in a restaurant and wonderful time in a local swimming pool. We could also try some regional tastes and eat dinner in a restaurant serving all dishes made of goose.

The last and the most interesting part of the day was a visit in „Astrobaza” observatory. We had a meeting with physicist and students interested in astronomy. They were talking about the sky, planets and what is more – we could observe the stars, too. This visit was organised late at night and after this trip we didn't even feel like dancing...

# DAY 5

... It was a sad day. We didn't even want to talk during a breakfast time. We all knew it was time to go home and to say goodbye to our French and Italian friends. That week passed so fast. After breakfast our coach took us for the last trip. It was a trip to the nearest breeding center. We were all amazed how many animals there were. We had a meeting with some workers who were telling us about milk and meat production in that center. After a coffee break our coach took us and our friends to the airport in Warsaw.

Thanks to you, our dear friends, we have wonderful memories. It was really busy week but it was worth it.

**Next stop - FRANCE :)**

# SECOND MOBILITY FRANCE - LEAP ST CYRAN DU JAMBOT 14-18 October 2019

# DAY 1

... For many of us it was our first experience with planes and flights. We were so excited about it. We were in France – can you believe this? How lucky we were :)

After a French breakfast there was a welcoming speech with the president of the school association and headmaster. All the people were so nice and kind for us. The school presentation was very interesting. Then we all were divided into workshops groups. We had activities with owl pellets, painting on bed sheets, visiting stables and small horse breeding of the school. There was also a visit of milking farm producing ice cream.

It was such an exciting and busy day. At the end of the day there was a dinner with school teachers and French specialities. We could laugh, talk and dance of course...

# DAY 3

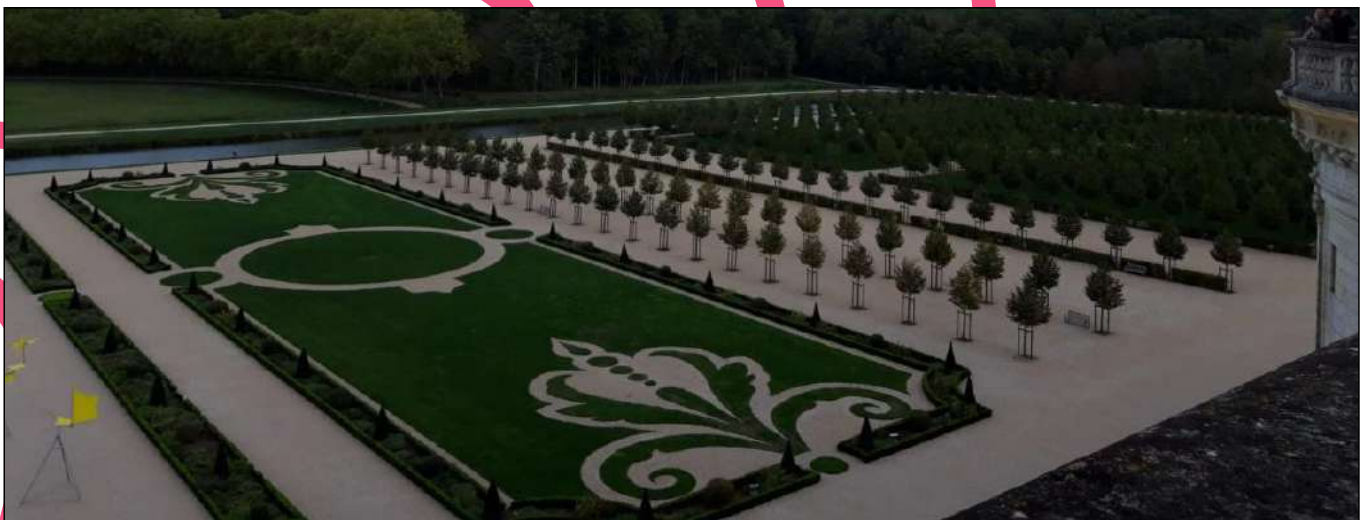

... That day we had to wake up really early because of the attractions planned for us. We went for a guided trip to Chambord castle. The castle, its history and exhibits were impressing. A bike ride arranged for us around the castle and through the gardens and park was great. We were so happy because of that. Evening talks and dancing after the dinner were all what we really needed after such a busy day...

# DAY 4

... That day we spent on school's territory. Our French friends presentations were on a really high level. It was interesting and informative. We could get to know a lot about French agriculture, tourism and wildlife.

The next step was a visit of an eco grazing sheep farm. We could also see herding dogs in action. It was amazing.

Then we came back to school for horse-riding classes. We had so much fun.

Before dinner we had a meeting during which we were given the certificates of attendance of French mobility.

... and the last dinner, last dancing and talks till the late night. We all knew it was our last night with our friends in France...

# DAY 5

... Our last day of stay in France. We went for a short trip around the nearest town. We visited many interesting places. We could buy some souvenirs, too. Then we had to go to the airport to catch our plane home...

Thank you France – for all your hospitality and kindness.

***Merci beacoup!***
